4. Regular Monitoring and SIP Revision

- *The SIP remains in effect for the duration of the school year, except the plan and its implementation shall be regularly monitored and revised as necessary based on student needs to ensure that all students are provided opportunities to meet the challenging State academic standards.*
- *The school will annually evaluate the implementation of, and results achieved by, the schoolwide program using data from the State's annual assessments and other indicators of academic achievement to determine whether the plan has been effective in increasing achievement of students in meeting the State's academic standards, particularly for those students who had been furthest from achieving the standards. The school will revise the plan, as necessary, based on the results of the evaluation, to ensure continuous improvement of students in the schoolwide program.*

Explain how the SIP Committee meets and discusses school programs implemented, as outlined in the SIP, to determine effectiveness and to assist in planning for the upcoming school year:

- SIP committee members were assigned.
- SIP team analyzed data and determined areas of need.
- SIP team developed plans of action to support stakeholder needs.
- SIP team will meet on a monthly basis to assess implementation of plans of action.
- At the end of the year, SIP team will determine effectiveness of implemented plans and adjust if needed.

Describe how the SIP is monitored during the school year using multiple types of data and how the information is used to make necessary adjustments to increase student learning:

- In-class grades
- Exam grades
- SLT/LEAP 360 assessment results
- Common Formal Assessment results
- LEAP 2025/EOC scores
- Discipline data/trends

Describe how diagnostic, interim, and summative assessment data is used to evaluate instructional practices, determine patterns of student achievement, growth, and changes in growth gaps across classrooms, grade levels, content areas, claims/subclaims, and subgroups:

- Classroom and exam data is used to identify if teachers need assistance with instructional practices
- Teachers use formative, summative, and other classroom assessments to monitor student progress and make instructional decisions.
- Progress reports and report cards allow TAT team to identify students who need academic intervention.
- Assessment and classroom data determines how to place student in specific classes (Resource, on-level, honors, etc.)
- Discipline data/trends determine behavioral interventions and support given.

Describe how results of this assessment are reported to the school's stakeholders:

- The results of the SIP will be posted on the school website once it is evaluated. They will also be posted at the school site.
